

**DEMEX**  
Demolition | Excavation | Remediation

# CAIRNS PERFORMING ARTS CENTRE

**MAY 2016 - JUNE 2016**

**CLIENT: FKG GROUP**

**CONTRACT VALUE: \$585,000**

DEMEX was engaged as demolition contractor for the demolition of Cairns Civic Centre to facilitate the construction of the Cairns Performing Arts Centre.

During the friable asbestos removal program, asbestos containing paint was identified on the building fabric which could not be successfully removed with any level of assurance.

Working with WHSQ and the independent licensed asbestos assessor, DEMEX prepared a demolition plan that involved deconstruction of the structure under friable asbestos conditions. All generated demolition waste was treated as asbestos contaminated and disposed of accordingly.

A 62 tonne specialised high-reach demolition excavator was mobilised to Cairns to complete the safe demolition of the structure.
